

International Parking & Mobility Institute

## IPMI Consultants: Important Survey Will Provide Actionable Insights for Your Firm

**This survey, specifically for parking/mobility consultants, gives your firm the opportunity to participate -- and benefit from -- the International Parking & Mobility Institute's (IPMI) initiative to collect and study KPIs (Key Performance Indicators).**

**We have expanded this survey in preparation for the next publication in the series, to be released in mid 2019. If you completed the survey in the past, terrific - and thank you! We are asking you to complete the survey again, to build on the cumulative value of the project.**

**All data will be aggregated and anonymized prior to sharing. Your responses will be absolutely confidential.**

**If you have questions about the survey, or encounter problems in taking it, contact Helen Sullivan at [sullivan@parking-mobility.org](mailto:sullivan@parking-mobility.org).**

\* 1. Contact Information (Confidential - only to be used if clarification of your answers is needed and to ensure companies do not submit duplicate data.)

Name

Company

Address

City/Town

State/Province

ZIP/Postal Code

Email Address

Phone Number

\* 2. Are you a member of the International Parking & Mobility Institute?

- Yes
- No
- I'm not sure

\* 3. Zip/Postal Code where your firm is headquartered.

\* 4. Approximately how many full-time employees are on staff across all of your operations? *If you employ part-time employees, count their efforts toward full time equivalent status (for example: 2 half-time workers = 1 full-time worker).*

2018

2019

5. This question five (Q.5) through Question 10 (Q.10), address only those projects for which your firm serves as the Engineer or Architect of Record.

Approximately how many of your new design projects have been/will be constructed? *Include only parking garage design projects (both stand-alone and mixed-use) that have been/will be constructed.*

Constructed in 2018

Projected construction  
2019

6. Approximately how many spaces are included in the new design projects in Question 5?

Constructed in 2018

Projected construction  
2019

7. What is the approximate total construction cost for the new design projects in Question 5?

Total construction costs for  
2018

Total construction costs  
projected for 2019

8. Approximately how many of your renovation/expansion projects have been/will be constructed?*Include only parking garage renovation and expansion projects (both stand-alone and mixed-use) that have been/will be constructed.*

Constructed in 2018

Projected construction in 2019

9. Approximately how many parking spaces are included in the renovation/expansion projects in Question 8?

Constructed in 2018 (# of spaces)

Projected construction 2019 (# of spaces)

10. What is the approximate total construction cost for the renovation/expansion projects in Question 8?

Total construction costs in 2018

Projected construction costs in 2019

11. What was your annual gross revenue for parking-related projects? This should include all parking-related projects including consulting and studies. This can be the calendar year or fiscal year. (For Canada, enter this number in your local currency).

2018

Projected 2019

12. Approximately what percentage of your projects, ranging from consulting to construction, include an element of mobility (i.e. multi-modal transportation, technology employed to increase mobility options)? Express this number as a percentage in terms of number of projects, e.g. 10 out of 50, so 20%.

0%  100%

13. If you had to summarize trends that are having the most significant effect on your parking/mobility projects in KEY words, what would those key words be? (For instance, energy savings, autonomous vehicles, tight budgets, adaptive design, technology integration, curb management, high construction costs, etc.)

14. (Optional) Please share any other observations about industry trends/issues here:
